For studies that require assay-to-assay consistency, leukopaks can provide up to 100x more cells from the same donor than PBMCs. At Precision for Medicine, Research Use Only (RUO) leukopaks are custom collected to your specifications at FDA-registered facilities, ensuring optimal cell yield, viability, and quality. End-to-end chain of custody, collected in an in-house donor facility.

## Deeply Characterized

- Large database of recallable, HLA-typed donors
- Demographic information
- Medical history, disease characterization, outcome data
- CBC report available, all viral negative and vaccination status captured
- Custom characterization

## Quality Guarantee

- QC'd post thaw, 80-90% viability
- Consented and IRB approved for research
- Same-day collection and processing
- Custom processing and cell isolations
- World-class standards and certifications: CAP, CLIA, IRB, ISO, GxP
- Custom collections available to fit your research needs

## Highly Purified Cell Subsets

- Monocytes
- NKs
- T cells
- B cells
- PBMCs
- Dendritic cells

## Product Description

- RUO-mobilized (Neupogen®) or nonmobilized leukopaks
  - Full-size leukopak (10-12B cells, 300 mL)
  - 1/2 size leukopaks (4-6B cells, 150 mL)
